

## 2016 State Track Advisory meeting

### Discussion

- **300 meter hurdles and 400 meter run to be timed finals at the state meet**
- Class B wants to know where events would be held within the meet before voting. Class A opposed at this time
  
- **Friday 3:00 start time**
- Meet in NW finish after 9:30 and the NE finished around 9:00
- Why can't Friday time be open to start earlier so finish is not so late?
  
- **Request for the office**
- Compile statistics regarding # of athletes who qualified, # who actually competed, # graduating, # returning, # who met standard
  
- **Clean up the state reporting site**
- Kevin will clean up the site periodically as second state qualifying time is not needed
  
- **Qualifying in the 4x800 and 3200**
- How many is too many in the event and in each heat
  
- **Seed finals by time and not placing in each heat**
- Should we take the top 9 finishers in terms of time instead of current system

### Items to be presented to the board for regulation change

#### **Class A – Provisional qualifying standard.**

Class A would like a provisional qualifying standard to exist on an as needed basis. There would be a provisional standard for all individual running events 400 meters and under as well as all field events. The standard could be implemented after declarations on Tuesday prior to the state meet. If any above event does not contain two full heats or flights, then the provision standard would be utilized. It would only be utilized to fill the lanes or flights in the events that are not full.
